PROFESSIONAL SUMMARY

Results-driven Data Analyst with expertise in transforming complex datasets into actionable business insights. Proficient in Python, SQL, Power BI, and Advanced Excel with strong foundations in statistical analysis and data visualization. Experienced in developing ETL pipelines, creating interactive dashboards, and implementing data-driven solutions.

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL)

Data Visualization: Power BI, Tableau, Microsoft Excel (Advanced)

Data Analysis & Statistics: Statistical Analysis, Hypothesis Testing, Predictive Modeling, Data Mining

Tools & Technologies: Git, Linux, Jupyter Notebook, ETL Processes

Core Competencies: Data Structures & Algorithms, OOPs, Computer Networking, Database Management, Problem Solving

PROFESSIONAL EXPERIENCE

Data Analyst Training

APTRON

June 2022 – August 2022
Lucknow, Uttar Pradesh, India

- Analyzed large datasets using Python (Pandas, NumPy) and SQL to identify trends and patterns, improving data accuracy by 25% through data cleaning and preprocessing techniques
- Developed 5+ interactive Power BI dashboards for real-time business metrics visualization, enabling stakeholders to make data-driven decisions and reducing report generation time by 40%
- Performed exploratory data analysis (EDA) on customer datasets with 50,000+ records, uncovering key insights that informed marketing strategies and customer segmentation models
- Collaborated with cross-functional teams to define KPIs and created automated Excel reports using VBA and advanced formulas, streamlining weekly reporting processes
- Implemented ETL workflows to extract, transform, and load data from multiple sources, ensuring data integrity and consistency across business intelligence platforms

KEY PROJECTS

Credit Risk Analysis & Scoring System

Python, MySQL, scikit-learn, Power BI

- Developed an end-to-end credit risk pipeline processing data across 5 MySQL tables, leveraging logistic regression and 4+ engineered business features to generate automated risk-band scores for loan assessments
- Implemented 10+ validation rules and an automated daemon-based workflow, reducing scoring errors by an estimated 30–40% while ensuring 100% rejection logging and real-time database updates

Sports Analytics: Olympic Games Analysis

MySQL, SQL, Power BI, Python

- Built a normalized Olympic analytics warehouse spanning 120 years of data (1896–2016) across 11 relational tables, consolidating 268K+ records, 128K+ athletes, 66 sports, and 757 events for scalable analysis
- Developed 17 advanced SQL analytics queries and an interactive Power BI dashboard covering 260K+ participation records, enabling multidimensional insights and uncovering demographic outliers and hidden medal trends

EDUCATION

Babu Banarsi Das University

Bachelor of Technology in Computer Science

Lucknow, Uttar Pradesh, India
August 2019 – June 2023

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Statistics for Data Science, Machine Learning, Computer Networks

CERTIFICATIONS

- Python Programming: Basic and Advanced Certification
- Computer Networking Fundamentals: Network Architecture and Protocols
